OBJECTIVE

Entry-level Web Application Developer seeking to leverage hands-on experience building production web applications with JavaScript, React, and Python through AI-assisted development methodologies. Successfully developed and deployed MeetingQuick Chrome extension and portfolio website by translating requirements into functional code using vibe coding approach with modern frameworks and Git workflow. Strong problem-solving abilities with security-conscious development approach. Eager to join a collaborative development team and grow technical expertise in web application development.

CORE EXPERTISE & SKILLS

- **Published MeetingQuick Chrome Extension** - Used AI pair programming to translate requirements into functional JavaScript code and Chrome APIs
- **Deployed Production Portfolio Website** - Leveraged vibe coding to rapidly build React components and troubleshoot deployment configurations
- **Built Python Task Manager Application** - Applied conversational development to design GUI and implement task management logic
- **Managed Git/GitHub Version Control** - Collaborated with AI to resolve authentication issues and optimize commit strategies
